PREFACE

Final results from the 1971 Census of Population and Housing are being released in a series of 14 bulletins overing single and cross-classified characteristics of population and dwellings.

It should be recognised that in processing census data for 13 million persons and 4.5 million households there are innumerable possibilities for error. As in other areas of statistics, much of the effort of statisticians is directed to devising procedures which prevent most errors from occurring or which detect and eliminate those which do occur. Despite such efforts, it is impracticable to eliminate every inaccuracy but special steps such as editing and quality control procedures are taken to measure and control the level of such inaccuracy. Thus while some minor errors and discrepancies may be evident in the final results, it is unlikely that they would have any practical significance in the interpretation of the Census data.

A large number of tabulations are being produced for the 1971 Census which, because of their size and complexity, will not be published. In some cases, classifications of characteristics will be available at a finer level than those published in the Bulletins. A complete list of the tabulations produced (published and unpublished) and the levels of classification available will be published in the Catalogue of 1971 Census Tabulations (Bulletin 14). For information on the more detailed classifications and the availability of unpublished tabulations please contact the office of the Bureau of Census and Statistics in each State capital city or in Canberra.

As an illustration of the colour code system, all 'Summary of Dwellings' bulletins have light brown covers with a horizontal band varying in colour according to the State.

Coverage

In conformity with the 1967 repeal of Section 127 of the Constitution, 1971 Census statistics include Aborigines. In order to provide comparability between the 1971 and 1966 Censuses, tables showing 1966 data have been amended to include Aborigines or their dwellings and therefore differ from the 1966 tables previously published.

Persons with diplomatic immunity (diplomatic and home-based staff of diplomatic missions, and their families) are excluded from the Census. Dwellings occupied by persons with diplomatic immunity are also excluded.

(NOTE. Any discrepancies between totals and sums of components in percentages in tables are due to rounding.)

A FEW FACTS ABOUT THE CENSUS

At the Census everybody in Australia contributes

to Australia's knowledge about itself

YOUR FORM IS ABSOLUTELY CONFIDENTIAL. The LAW prevents anyone but the Commonwealth Statistician and his officers from seeing your return. OTHER PERSONS OR GOVERNMENT DEPARTMENTS CANNOT see your return for **any** purpose whatsoever.

THE STATISTICS ARE ESSENTIAL TO PEOPLE WORKING ON SUCH NATIONAL PROBLEMS AS:

- HOUSING NEEDS
- BETTER LIVING STANDARDS
- EDUCATION (SCHOOLS, TEACHERS, ETC.)
- WELFARE OF THE AGED, WIDOWS, ABORIGINES, MIGRANTS, ETC.
- CITY GROWTH, TRAFFIC PROBLEMS, ROADS
- SEWERAGE, WATER AND POWER SUPPLY
- EMPLOYMENT, UNEMPLOYMENT, VOCATIONAL TRAINING
- DECENTRALISATION, RURAL DEPOPULATION, LOCATION OF INDUSTRY

MOST CENSUS INFORMATION CANNOT BE OBTAINED IN ANY OTHER WAY. The great value of the Census is that all the information about everybody is obtained at the one time. This means that it can be added together and cross-tabulated to give a very detailed statistical picture of AUSTRALIA at a single point in time. Without you the picture would be incomplete.

THE STATISTICS ARE AVAILABLE TO YOU. All the statistical tables which are compiled from the Census serve important Governmental purposes, but they are also available to private individuals, the business community and researchers.

HOUSEHOLDER'S SCHEDULE

Under the provisions of the *Census and Statistics Act* 1905–1966 you are required to fill in this form to the best of your knowledge and belief. However, there is no penalty for omitting information on a person's religious denomination.

The information supplied in this form is CONFIDENTIAL. The Act provides that it cannot be seen by any persons other than officers of the Bureau of Census and Statistics. It will be used only for obtaining totals for statistical purposes.

The completed schedule should be ready to hand to the Census Collector who will call on THURSDAY 1 JULY or as soon as possible after that day.

I certify that to the best of my knowledge and belief this form has been correctly filled in.

HOW TO FILL IN THIS FORM

After you have read the instructions:

- **Step 1:** Lift this flap and fill in page 1 for all persons who spent the night of Wednesday 30 June in this household.
- **Step 2:** Give particulars of this dwelling on pages 2 and 3.
- **Step 3:** Complete a double page of personal particulars for each person listed on page 1.
- **Step 4:** Sign the form on the front page.

INSTRUCTIONS

1. FILL IN A SEPARATE FORM FOR EACH HOUSEHOLD.
   A household is a domestic group living and eating together. A person living alone is also a household.
2. IF THERE IS MORE THAN ONE HOUSEHOLD OBTAIN EXTRA FORMS FROM THE CENSUS COLLECTOR WHEN HE RETURNS.
3. THIS BOOKLET HAS PAGES FOR 8 PERSONS. IF THERE ARE MORE THAN 8 PERSONS IN THE HOUSEHOLD OBTAIN PERSONAL SLIPS FOR THESE EXTRA PERSONS FROM THE CENSUS COLLECTOR WHEN HE RETURNS.
4. IF ANY PERSON IN THE HOUSEHOLD, SUCH AS A VISITOR OR BOARDER, PREFERS TO FILL IN A SEPARATE FORM TO MAINTAIN PRIVACY, ASK THE COLLECTOR FOR A 'PERSONAL SLIP' AND AN ENVELOPE. The Personal Slip should be filled in and sealed in the envelope by the person concerned, for delivery by you unopened to the Census Collector with this schedule.
5. FOR ANY PERSON WHO COMPLETES A PERSONAL SLIP, ENTER ON PAGE 1 OF THIS SCHEDULE THE NAME, RELATIONSHIP AND SEX OF THE PERSON AND WRITE 'P.S.' IN THE AGE COLUMN.
6. Not all questions have to be answered by everybody. Read each question carefully, give your answer, then follow the directions to the next question which applies. Most questions can be answered simply by placing a tick in the appropriate box, e.g.

   Yes ☐ No ☑

7. If you do not know the exact answer to a question, give the best estimate you can.
8. Please use ink or ball point pen.
9. The completed schedule should be ready to hand to the Census Collector who will call on THURSDAY 1 JULY or as soon as possible after that day.
10. If you need any help with this form, telephone the Divisional Returning Officer for your Commonwealth Electoral Division, or ask the Census Collector when he returns.

NOW LIFT THIS FLAP AND FILL IN PAGE 1

EXPLANATORY NOTES

The Householder's Schedule

The Householder's Schedule used for the 1971 Census of Population and Housing represents a major departure in design from that used at the 1966 and earlier Censuses. The single large sheet used previously, with provision for a maximum of 8 persons, was replaced by a booklet-type Schedule with extensive use of the tick-box type question. In this schedule (a facsimile of which appears on pages ix to xii), the first page (page 1) provided for a list of persons in the dwelling, pages 2 and 3 contained questions relating to the dwelling, while the remaining 16 pages provided for two pages of questions to be completed in respect of each person listed on page 1.

The ordering of the questions was designed to minimise the number of questions to be answered by any one person. For persons under 5 years of age a maximum of 12 questions required an answer and 15 questions applied to those under 15 years. Males were not required to answer questions on issue and duration of marriage (Question 11) and only employed persons completed details of hours worked, occupational status, industry and occupation (Questions 15-18).

Definition of dwelling

An occupied dwelling is defined as any habitation occupied on Census night by a household group and may comprise the whole or only a part of a building. A household group is a person or group of persons living and eating together. The number of occupied dwellings and the number of households are therefore identical.

An unoccupied dwelling is defined as a structure built specifically for private living purposes and which is habitable, though unoccupied at the time of the Census.

Non-private dwellings are those dwellings which provide group-accommodation such as hotels, motels, hostels, and staff quarters and institutions such as hospitals, nursing homes, prisons, boarding schools, etc., and which were occupied on Census night. For such dwellings no details of the characteristics other than class of dwelling were sought.

Persons who on Census night were camping out, travelling on board ships in Australian waters or between two Australian ports, or who were enumerated on long distance trains, buses or aircraft were not regarded as living in a dwelling for census purposes and are shown under 'campers-out' and 'migratory' in Table 2. Persons classified as campers out include those living *temporarily* in tents, caravans or houseboats or who were camped out on Census night. Tents, huts, caravans and houseboats which were being used to provide semi-permanent accommodation were classified as dwellings.

Geographic distribution

'Major urban' denotes all urban centres with a population of 100,000 or more. The population and dwellings in all other urban centres below this size are included under 'other urban'. The balance of the State or Territory other than migratory (*see* above) is classified as rural.

The criteria used for delimiting urban centres at the 1971 Census, as determined by the Thirty-first Conference of Statisticians, October 1969, were as follows :

1. At each Census of Population and Housing a boundary shall be defined in accordance with these Resolutions for each population cluster of 1,000 or more population (and for known holiday resorts of less population if they contain 250 or more dwellings of which at least 100 are occupied). These clusters shall be named 'urban centres' and the population and dwellings enumerated in them shall be classified as urban for statistical purposes.

2. Around each urban centre with a population of at least 100,000, a further boundary shall be defined after consultation with planners, to contain the anticipated development of the urban centre and associated smaller urban centres for a period of at least twenty years. Such a boundary should delimit an area which is now, or is expected to be, socially and economically oriented towards the urban centre. It shall consist of complete Local Government Areas if possible. This fixed boundary (as distinct from the urban boundary which is moving) will delimit an area which, for general statistical purposes, is free from the practical problems imposed by the moving boundary, but which nevertheless represents the city in a wider sense.

3. In delimiting urban centres with 25,000 or more population :

   (a) All contiguous Census Collector's Districts which have a population density of 500 or more persons per square mile shall be included. Consequently, State, Statistical Division, Local Government Area and other administrative boundaries shall be disregarded;

   (b) A Collector's District which is known to contain a high proportion of holiday homes shall be classified as urban if the dwelling density is 125 dwellings per square mile or greater;

   (c) A Collector's District consisting mainly of land used for factories, airports, small sports areas, cemeteries, hostels, institutions, prisons, military camps or certain research stations shall be classified as urban if contiguous with Collector's Districts which are themselves urban;

   (d) Any Collector's District which consists mainly of land used for large sporting areas, large parks, explosives handling and munitions areas, or holding yards associated with meatworks and abattoirs shall be classified as urban only if it is bordered on three sides by Collector's Districts which are themselves urban;

   (e) Any area which is completely surrounded by Collector's Districts which are urban must itself be classified as urban;

   (f) Where an urban centre of 25,000 or more population is separated from another urban centre by a gap in actual development of less than two miles (by the shortest rail or road distance), the gap shall be bridged by classifying a connecting Collector's District or Districts as urban, and therefore treating the urban centres as one; if the gap is two or more miles (and whether or not it is comprised mainly of reserved land or a natural barrier) the urban centres shall remain separate;

   (g) Any area included in an urban centre in 1971 or thereafter under the provisions of this Resolution shall continue to be so included unless the population of the urban centre falls below 25,000, in which case this Resolution will cease to apply;

   (h) Large peripheral Collector's Districts in growth areas shall be fragmented; and so far as the availability of visible boundary features allows, the fragments so created shall be as near square-shaped as possible and of such a size that they will contain a collector's workload when fully developed. For the purposes of delimiting urban centres such fragments shall be regarded as Collector's Districts.

4. In delimiting urban centres with less than 25,000 population :

   (a) The urban centres shall be delimited subjectively (by the inspection of aerial photographs, by field inspection and/or by consideration of any other information that is available);

   (b) All continuous urban growth is to be included (which in small urban centres would not necessarily occur if the density criterion were applied), together with any close but non-contiguous development which could be clearly regarded as part of the centre. However, cognisance shall be taken of Resolution 3, where appropriate, particularly in urban centres which are approaching a population of 25,000.

In the following notes on the individual topics appearing in this bulletin, reference to the specific question in the Householder's Schedule appears in parentheses.

Class of dwelling (Question D1, page 2 of Schedule)

For the 1971 Census the question on the Schedule was expanded by means of illustrations and descriptions to assist householders in assigning their dwelling to an appropriate dwelling type. This was particularly necessary to enable identification of villa units, an important type of medium-density dwelling which has become common in Australian cities since the 1966 Census. The terms used to describe this type of dwelling vary over Australia and the Census Schedule used in each State and Territory was varied appropriately. The term 'villa unit' used in this bulletin covers dwellings described variously as villa unit, town house, cottage unit, villa development, cottage flats.

'Private houses' comprise dwelling types 1 to 4 on the Schedule and 'other private' include dwelling types 7, 8 and 9.

In cases where the question was not answered a class was allocated on the basis of other information on the Schedule and answers given for adjacent dwellings.

Number of rooms (Question D4, page 3 of Schedule)

For census purposes 'rooms' exclude bathrooms, toilets, pantries, laundries, storerooms, halls and rooms used only for business purposes, but include permanently enclosed sleep-outs. Combined-purpose rooms such as a living-dining room were treated as one room.

When no answer had been given to this question a number was allocated on the basis of the answer given for the geographically nearest dwelling of the same class, except in the case of improvised homes, caravans, houseboats, etc. when a number was allocated from a table of random numbers based on the distribution of the number of rooms, recorded in those types of dwelling at the 1966 Census.

Number of bedrooms (Question D5, page 3 of Schedule)

Nature of occupancy (Questions D10 and D11(a)(b), page 3 of Schedule)

At the 1966 Census 'tenant of employer' was combined with 'tenant other'. With the separate identification of 'tenant of employer' in 1971, data for 'tenant other' is not comparable between the two Censuses.

Material of outer walls (Question D3, page 3 of Schedule)

At the 1966 and 1971 Censuses cases where no answer was given were allocated a material based on the answer given for the geographically nearest dwelling of the same class.

Gas, electricity and television facilities (Question D9, page 3 of Schedule)

Number of motor vehicles (Question D14, page 3 of Schedule)

Bathroom and kitchen facilities (Questions D6 and D7, page 3 of Schedule)

Sewage disposal (Question D8, page 3 of Schedule)

Number of flats in block (Question D1(b), page 2 of Schedule)

Number of homes (Question D13, page 3 of Schedule)

Unoccupied dwellings (back page of Schedule)

For dwellings not occupied on the night of the Census, collectors were required to indicate on the schedule the class of dwelling and, as far as they could determine it, the basic reason why the dwelling was unoccupied.
